

# **B2G Music Application**

## **Application Wireframes**

**V1**

05-02-12

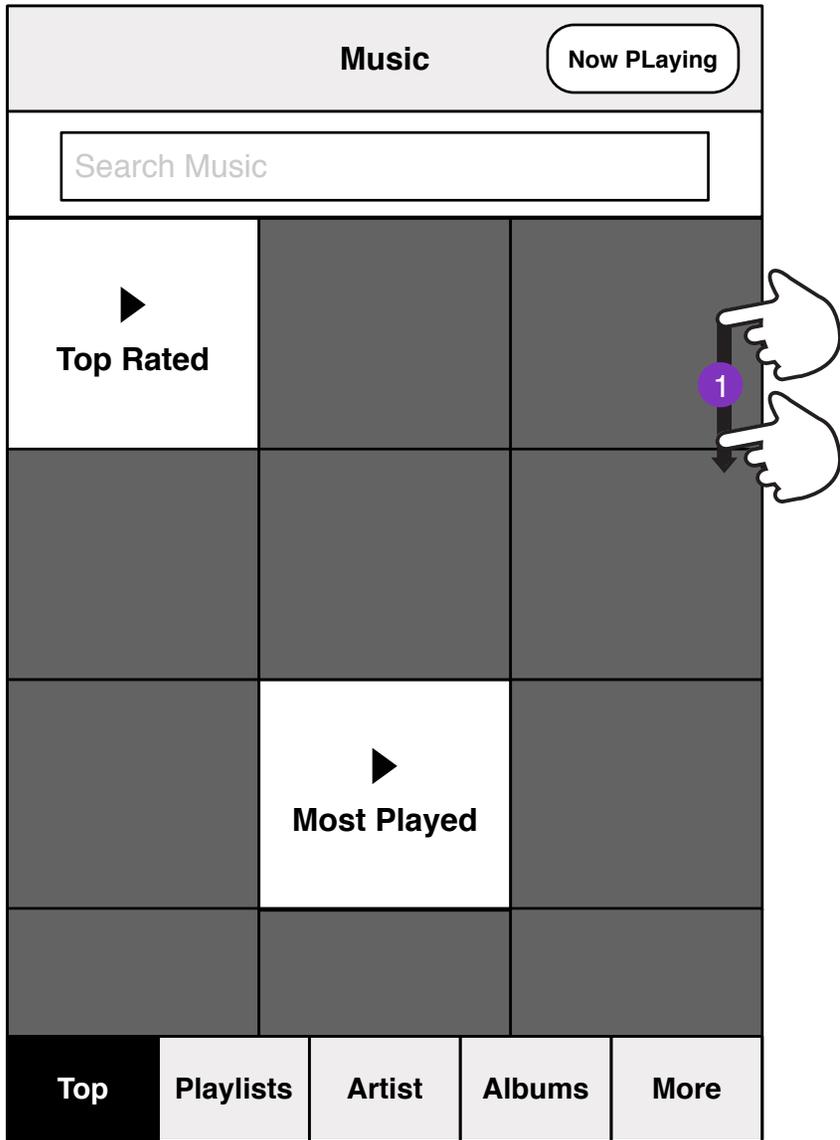

When the user first arrives at the music player, they are presented with the Top Music page which showcases generated playlists and album artwork.

1. Selecting flathead will shuffle play playlist. Selecting Album art will play album or artist.

2. If music is playing, a Now Playing button brings user directly to the Player Screen.

- 3. More
  - Audio Books
  - Podcasts
  - etc.

1. Pulling down at the top of any list content will reveal search bar.

Albums		Now PLaying
