

- communications w/ Socorro
- release - issues/tracking
- actively tracking top crashers
- good at release to release comp
crashes per 100 ADU
- rapid release - pretty good
at fixing code regressions
- mitigate out of memory crashes
- outreach to partners
- better tools for users who are
crashing alot
- good additions for mobile
 - urls
 - top crash
- Socorro - links to bug
- fixed lots of small things in Socorro
- not losing crash report date
- good at logging top crashes

- getting developers assigned
to top issues - lower pri issues
- communications - lists
- less good at lower priority
crashes
- eng community less connected
with crash process
- no clear way to communicate
good metric of how we are
doing
- triage
- not done much since OOPP
to help with plugin crashes
- have not improved our
ability to deploy blacklist
- not made blacklist tool for
handling large problems.
- mobile can't persist state
- Socorro not good at adding
new reports
- Socorro - lots of churn over
priorities
- more community involve
ment
