Getting involved into Mozilla QA !

Carsten Book
Mozilla QA Team

Stockholm, 02.June 2009

- What Is Mozilla QA

- Be part of the Community ! - > What you can do today!

- How to f nd out more

Mozilla QA is the Mozilla Quality Assurance

▸ We test new Firefox Releases to maintain the great quality of Firefox, Fennec and Thunderbird

▸ Team of 18 Full Time Employees working on a lot of tasks in Areas like Release Testing, Automated Testing, Community Building, etc

▸We also work together with thousands of Community Testers worldwide !

▸ We organize QA Events (Testdays/Bugdays) Meetups and join Conferences to get more interested people involved and to help them to get started in QA !
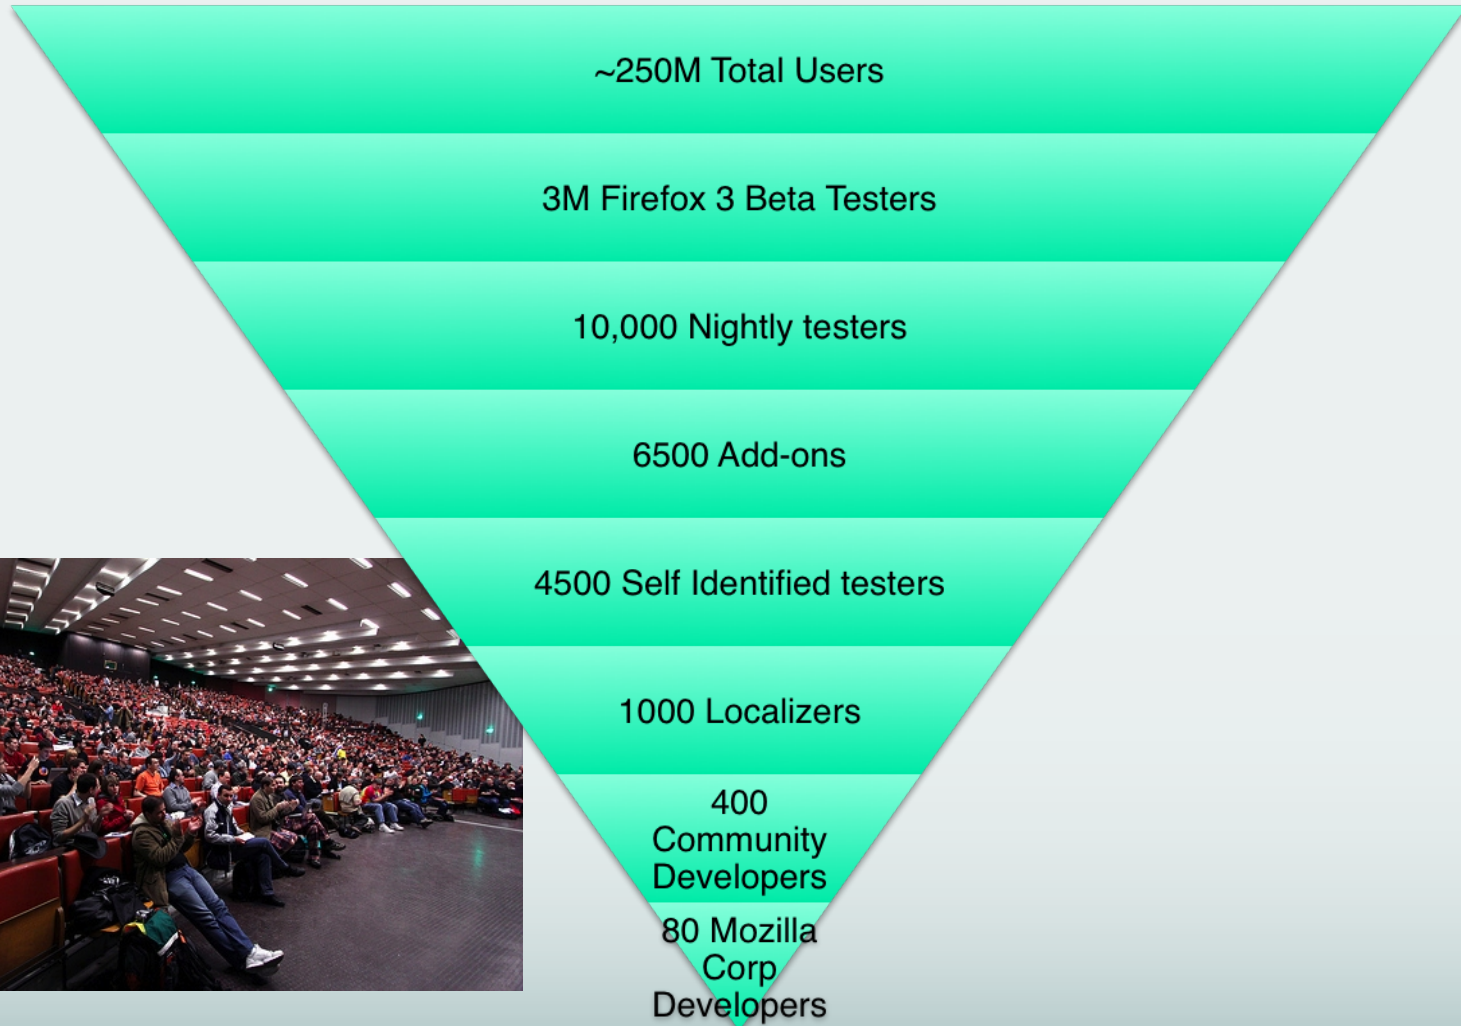

Community Members contribute by:

- Triaging bugs: conf rming, STR, regression ranges
- Developing tools: test tools, analysis tools, performance tools, build tools
- Running tests

Stockholm - 2.June 2009

~250M Total Users

3M Firefox 3 Beta Testers

10,000 Nightly testers

6500 Add-ons

4500 Self Identified testers

1000 Localizers

400 Community Developers

80 Mozilla Corp Developers

It's not just about coding!

Projects

The best way to get involved is to join a Mozilla QA Project! Check out the areas below and see if anything we're working right now is interesting to you.

Test

Testing nightly builds of Firefox, creating testcases in Litmus, verifying bugs in Bugzilla, etc.

- **Windows 7 Firefox Testing**
- **Mobile Firefox (fennec)**

Code

Working on test automation, submitting patches for bug fixes, developing QA tools, etc.

- **QA Companion**
- **MozMill**

Bugs

Triaging bugs in Bugzilla, reproducing topcrashers, reporting issues, etc.

- **Fx3.1 Fixed, Verified, Branched bugs and You!**
- **Bugzilla Queries**

Data

Crash analysis, responding to Hendrix feedback, tracking bug queries in Bugzilla, etc.

- **Crash Analysis**
- **QMO Content Coalition**

- Bug Triage

Conf rm, specify Steps To Reproduce (STR), regression ranges. Respond to qawanted, regressionwindow-wanted

- Testing

Help testing new features, join test days and bug days, test releases, create manual test cases, create automated test cases, encourage community testers.

- Test Tools

Help maintain and develop MozMill, unit test infrastructure, QA Companion extension, analysis tools, performance tools, build tools
